

CROWDSTRIKE FALCON PREVENT ANTIVIRUS SOFTWARE

Now Available to You!

ANTIVIRUS PROTECTION

With many MTA employees and family members working and learning remotely, the number of connected devices is rapidly increasing. This gives hackers more open targets, which may be unprotected, and increases the risk of cyberattacks to MTA and your personal data and systems.

MTA IT is offering you a personal-use license of CrowdStrike Falcon Prevent Antivirus Software to prevent malicious viruses from infecting your personal computers and laptops.

CLOUD-BASED SERVICE

CrowdStrike Falcon Prevent is a cloud-based service that can be installed on up to five personal Windows pcs and laptops and will work alongside other installed anti-virus products such as McAfee and Norton.

If you do not currently use anti-virus software, we strongly encourage you to give this a try. If you choose to, you may replace other paid anti-virus products or services you presently use with Falcon Prevent.

TAKE ADVANTAGE OF THIS OFFER

You can download and install CrowdStrike Falcon Prevent on up to five personal Windows pcs and laptops using the same verification code.

1. To request a unique verification code licensed to you, submit a request in ServiceNow using the new [CrowdStrike Offer Form](#). Manager/supervisor approval is not required. You can set up your account using either your MTA or personal email address. MTA will not have access to any data related to your use of this product. Use is voluntary and your account is maintained by the vendor, CrowdStrike, not MTA.
2. Once your request is approved and fulfilled, you will receive an email from MTA-ITEndpointSecurity@mtahq.org with your verification code and installation instructions.
3. Download CrowdStrike Falcon Prevent on up to five personal Windows pcs or laptops at the CrowdStrike link provided in the MTA-IT Endpoint Security email.

Note that this offer is for personal devices only.

QUESTIONS OR CONCERNS

We are offering this software to support your vigilance and emphasize best practices in keeping the MTA technology environment safe.

If you have questions or concerns, please contact the IT Service Desk at 646-252-8888.

Be smart, do your part!
